A summer's day, a winter's night
The falling snow, the burning light
All around you
Adversaries in your sight

The bursting bombs forsake your heart
The way you put yourself in harm's way
For me
I believe you make me free

Oh-oh-oh-oh

CHORUS: Take away the shackles and chains for my hero
Know you're not alone
Dream the world at peace and without war for my hero
Soldiers coming home
For my hero

About the time the sun goes down
You wonder if you'll be around
Tomorrow
Your soul will keep you through the night

A morning rain begins to fall
A gentle breeze begins to call your name
Out loud
You're the seed that springs to life

Oh-oh-oh-oh

CHORUS: Take away the shackles and chains for my hero
No, you're not alone
Dream the world at peace and without war for my hero
Soldiers coming home
Oh the eagle flies above the fruited plain for my hero
The buffalo still roam
For my hero

For my hero, for my hero, for my hero, for my hero
