

# I'm Gonna Save Myself

music & lyrics by Tysa Goodrich

1. How far can you deceive yourself before you're swallowed by the dark  
The old ways that you perceive yourself is a slow and dying art  
I would have followed you to the ends of the earth  
But I won't follow you into hell  
Cause flowers bloom and the oceans rise  
So I'll be on my way - - - -

**CHORUS** I'm gonna save myself  
I'm not turning back to redeem myself in your eyes again  
I unlocked the door with a key that I found when  
I forgave myself . . . . . I 'm singing a song of freedom  
I'm gonna save myself . . . 1. 2. I'm gonna save myself this time  
(3. I'm gonna love myself this time)

2. I will drive in my car until the sun comes over the rise  
Tail lights fade into daylight and I'm cold and hungry for life  
I stop to get a bite at a coffee shop  
And I stare out through the glass  
An eagle floats on a mountain breeze  
I smile, I cry, and I pray - - - -

## CHORUS

BRIDGE It may appear that I am lost, but I am willing to pay the cost  
To take this chance, to find myself

3. The night sky holds me together in a wondrous comforting dark  
There are so many dreams to come in a million dancing stars  
It would be easier to imagine the worst  
But I don't give it too much time  
A flashing light on a roadway sign  
Saying I am on my way - - - -

## CHORUS
