

## So Close But So Far Away

music & words by Tysa Goodrich

1. I saw you standing there, you smiled and held my stare  
Then I waved goodbye as the train moved down the line  
I didn't understand, a stranger held my hand  
As my heart broke down when I heard the whistle blow

CHORUS: We came so close but so far away  
Was it fate that brought us here?  
Was it fate that took you away?  
Maybe someday I will see your face again  
We came so close but so far away

2. I never saw you again, you were a soldier then  
And the year was nineteen-forty-two  
I've had a lovely life, but I'm a little sad tonight  
Cause I heard your voice call from paradise

CHORUS; We came so close but so far away  
Was it fate that brought us here?  
Was it fate that took you away?  
I know someday I will see your face again  
We came so close but so far away

BRIDGE (instrumental)

CHORUS: We came so close but so far away  
Was it fate that brought us here?  
Was it fate that took you away?  
Here in heaven I can see your face again  
We came so close but so far away  
We came so close but so far away
